Installation

To connect your keyboard:

1) Turn off your computer power

2) Unplug the existing keyboard

3) Connect your new keyboard using the steps below

The keyboard comes with 5 connectors 1. Plug the black plug into the USB port. 2. Plug the purple plug into the PS/2 keyboard port (purple round port). 3. Plug the pink plug into the sound card's microphone port (pink round port). 4. Plug the light green plug into the sound card's earphone (speaker) port (light green round port). 5. Plug the speaker plug (light green female type port) into BOTH the headset and speaker ports.		USB plug
		PS/2 plug
		Microphone plug
		Earphone plug
		Extra speaker bypass plug
Headset extension port is located on the left side of the keyboard.		Headset extension port
USB 2.0 extension port is located on the right side of the keyboard. Supports most IT devices: Mouse • Digital Camera • MP3 Player Flash Drive • And more		USB 2.0 extension port

NOTE: For built-in extension ports on the keyboard

The built-in extension ports (1 USB/1 Audio in/1 Audio out) on the keyboard are available only when the USB plug and headset plugs are connected to your computer.
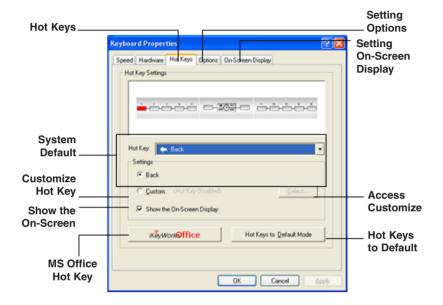

Installing the Keyboard Software

Before you can take advantage of the many features of your keyboard, you must install the driver. The driver is in the installation CD that came packaged with the keyboard.

Windows 95/98/ME/2000/NT4.0/XP installation:

1. Insert the included CD into your CD-ROM.

2. The Auto-run installation Menu window will pop up for your setup.

3. Follow the on-screen instructions to accomplish the installation.

Using the iOfficeWorks Software

To launch the iOfficeWorks software, double-click the ⊞ iOfficeWorks icon on the Windows Taskbar. The iOfficeWorks software brings you closer to your desktop, allowing you to set up and organize your keyboard for optimal use. Using the Hot keys and the iOfficeWorks software, customize your keyboard to access your Internet home page, favorite chat room, or run your e-mail application with the push of a button.

Popular Hot Keys

There are 17 programmable Hot Keys with default functions that are automatically supported by Windows 2000 or above Windows OS. (You have to establish the iKeyWorks to enable the Hot Keys in Windows 98 OS.)
